Experience

Veeva Systems

Product Designer // Jan - Apr 2020

Created prototypes for features related to machine learning, error reporting, and data management.

Led multiple rounds of usability testing, identifying key user experience issues early leading to a more intuitive final feature.

Redesigned various components in the design library, balancing consistency and flexibility while maintaining clarity for users.

UW Blueprint

UX Designer // Sept - Dec 2019

Redesigned the user flow for a client's application review process.

Led user interviews and synthesized insights to drive design decisions.

President // Jan - Aug 2019

Led an organization of 40 students, partnering with 5 non-profits to build them software products for social impact.

BlackBerry

Software Product Manager // May - Aug 2019

Mapped out the user experience of developers using the APIs to access BlackBerry's new IoT Platform.

Performed market research and competitive analysis to establish IoT use cases.

Rangle.io

Software Developer // Sept - Dec 2018

Developed a flexible React component library, enabling the rapid delivery of additional website pages for the client.

Worked closely with designers to ensure website was responsive, accessible, and coded exactly to visual specifications.
